

COMPOSITES AUVERGNE-RHÔNE-ALPES: a renewed participation on JEC WORLD and the inauguration of the Charter for Associate Members

COMPOSITES AUVERGNE-RHÔNE-ALPES: a regional collective dedicated to composites

The Auvergne-Rhône-Alpes Region, recognised at the European level for its composite expertise, is an important pool of innovative companies. The collective Composites Auvergne-Rhône-Alpes, with its diversified network of members and partners, embodies a real desire for innovation through numerous collaborative R&D projects (65 projects for 140M€), bringing together the fields of chemistry, textiles, plastics and mechanics.

Composites Auvergne-Rhône-Alpes is an entity created in 2009 representing 840 companies, made up of four competitiveness clusters (Axelera, Plastipolis, Techtera and ViaMéca) and three technical centers (Axel'One, IFTH and IPC).

Nine industrial members from the clusters on JEC WORLD PARIS

Nine companies will exhibit at the Composites Auvergne-Rhône-Alpes booth (Hall 5, booth E70) on JEC WORLD PARIS, the world's leading composite trade fair (from March 6 to 8, 2018 at the Exhibition Center in Villepinte).

Among them are representatives of the textile sector (Marduel, Schappe Techniques), the plastic industry (DMM, Pernoud, SISE), engineering and mechanics (CT2MC, EC2 Modeling, Sopara) and technical analysis (Novitom).

Signature of the Auvergne-Rhône-Alpes Composites Charter and opening to member companies

This major trade-show will be the opportunity for Composites Auvergne-Rhône-Alpes to expand its partnership agreement. Industrial members from the various clusters can become signatories of the Charter and participate actively in the definition of the roadmap and its associated action plan.

MEET US: on March 7th, 2018 at 12:00, Composites Auvergne-Rhône-Alpes booth,

Hall 5 - Stand E70 Villepinte Exhibition Center

The signing of the charter will be followed by a lunch cocktail.
