The TECHTERAFAB, a place for innovative co-working, is under construction!

The **TECHTERAFAB** is not a technical centre, university/school, base or research centre! It is a great facility for delving into one's imagination. **TECHTERAFAB**, located very close to **IFTH** and **ITECH**, completes our **regional and national** opportunities, enabling people to come and work together for a given time on projects.

Its special features: an area equipped to **accommodate your industrial machines** and confirm your concepts on a large scale; **shared offices** - with confidentiality - and the **TECHTERA** team to support you.

TECHTERAFAB is the **embodiment of innovative co-working** with textiles and flexible materials in one single environment. It is a **place for everyone** working with these materials. Based on a community of partners working together in one physical place, it is **UNIQUE PLACE! This is the Third Place for the textile and flexible materials sector.**

Do not hesitate to ask us about it. It is due to open at the end of 2019!

Focus

TECHTERA and the RECIT Club members initiate a census of industrial textile waste

Since its creation in early 2017, TECHTERA's RECIT Club (Recycling and Circular Economy in the Textile Industry) has been working on the **organisation needed for an industrial textile waste recycling sector**.

One of the challenges of setting up this sector is to **identify the waste to be treated**. However, there is no relevant data. Also, the amount of textiles discarded is often not listed by the manufacturers themselves. This is largely due to the lack of recovery procedures. Textile waste is therefore not separated from other industrial waste.

Through this census, TECHTERA and its RECIT Club members wish to identify the materials to be recycled, with the aim of **bringing them together**. It is by consolidating the textile waste present throughout the country that we can **reach quantities sufficient for an industrial-scale upgrading and treatment process** - using the latest technologies.

Information provided by **seven of the Club's manufacturers** has already allowed us to identify **180 tons, annually, of textile waste**. The amount already identified shows the need for organising the sector. Nevertheless, maximum response from manufacturers is decisive for ensuring a representative census.

Our services

TECHTERA on the road to South Africa

TECHTERA is part of an **exploratory textile mission to South Africa** (Cape Town), from **November 19 to 23, 2018**.

On the programme:

- The presence of your products on the joint stand, or your own stand, at the **ATF Trade Exhibition**, the leading exhibition on the continent
- A **B2B appointment programme** at the show
- **Joint visits** to industrial sites
- **Joint meetings** with local businesses

The AFT exhibition has been the **top African textile sourcing show** for 19 years. It is a place for local brand buyers and agents.

This mission will allow you to **develop your international business** in an emerging market, thanks to the privileged support of the cluster and its partners, as part of the **EU-TEXTILE 2030** project, co-funded by the **COSME** programme.

This action is financially supported by the AUVERGNE-RHÔNE-ALPES Region.

FOGALE NANOTECH

Spin off from the **CEA** (Atomic Energy Commission) and **ONERA** (National Aeronautics Design and Research Department) FOGALE Nanotech was **created in 1983** by three researchers who decided to make use of their investigations into **capacitive measurement technology**. Equipped with the know-how and unique skills; inspired by the spirit of innovation; enthusiastic about **finding solutions to unsolved metrology problems** of the leading manufacturers and research laboratories; the company quickly forged a reputation for excellence and an **international specialist in capacitive measurement technology**.

Your appointment with the cluster

September 4-6: MUNICH FABRIC START trade fair, MUNICH (Germany)

MUNICH FABRIC START is the **leading international fair for textile fashion and clothing** in Germany. Once again, TECHTERA is supporting companies of the **Auvergne-Rhône-Alpes** Region at MUNICH FABRIC START in Munich.

Five firms from the Auvergne-Rhône-Alpes Region will be present: **HENITEX, NUANCES, SATAB, PASTELS, MALHIA KENT**

This action is financially supported by the AUVERGNE-RHÔNE-ALPES Region.

September 17-20: AVANTEX show, PARIS LE BOURGET

The TECHTERA cluster will once again be present at the **international fashion and textile innovation show**. AVANTEX is the meeting place for **the most innovative enterprises** in terms of **materials, products and services for fashion**. TECHTERA's participation is motivated by a real desire to promote **regional technical and innovative materials**.

During the last edition, TECHTERA demonstrated the **great market potential** for textiles by illustrating the possibilities of this material. The aim was to **promote textiles, technical papers and functional fabrics** in the Auvergne-Rhône-Alpes Region on two specific subjects:

- **Technological clothing**
- **Technological innovation**

The February 2018 edition was marked by the **signing of a partnership** with **ESMOD**, the oldest fashion school in the world. This signing announced the **durability of the cooperation**. In this context, TECHTERA will **share a stand** with ESMOD at the **September edition**.

September 19-21: PREMIERE VISION show, PARIS VILLEPINTE

For the next edition of **Première Vision Paris**, **TECHTERA** and **UNITEX**, in partnership with **STARTEX**, are renewing the combined forum for **French Silk and Jacquard Fabrics**.

The aim is to **maximise publicity for Auvergne-Rhône-Alpes firms** at the show, by providing an open environment in which visitors can **discover and touch** the creations of participants; and where the cluster's team can present the various textiles and redirect visitors to the exhibitors' stands. The textiles will be highlighted with the creation of **two outfits by firms**, which will be returned at the end of the show, and a **display of cuts and samples**.
